

Oslo Open – Midnight sun race 14-16th of June 2024

After many years we are delighted to once again invite you to an international race here in Oslo. Back in 2003 Oslo was host of the European Championship 1:8 IC. Shortly after, drivers from all over the world could race our track on Virtual RC, as it was one of the first tracks available.

Powered by ENS

Oslo Open is powered by ENS. We are so excited to tell you that Uwe, Oli and Hartmut will run the race for us together with the Oslo club. Together we will make sure that we get the high quality race that you can expect from an international event.

Hverven Raceway - Oslo

The track is fast with a nice flow that many drivers like. You will experience high grip and low tire wear. The layout is easy to learn for new drivers and we expect close and exciting racing. The track has a beautiful location on a small hill, 500 meters from the beach, and only 45 minutes from OSL Airport Gardermoen. On the top level you will find Oslo's nicest camping site and the Motor Centre building with cafeteria and recreation area.

Midnight sun race

June in Norway is a special time with our super long days. This weekend the sun comes up at 03:54 and goes down at 22:42. As a special treat for you, we will run an extra 1:8 IC race Saturday evening with invited drivers and the possibility to qualify. 10 Drivers will run the Midnight Sun Race. The final is starting at 21:00.

Race information
